WRITING

Many TV programs, newspapers and ordinary people tell that ~~the~~ next hundred years are likely to be far worse than the last hundred years. But why do they think so?

They might have such opinion because number of bad things like nature disasters, political conflicts and ~~other~~ others increased in last ~~ten~~ ten or ~~twenty~~ twenty years. Despite this, I believe that ^{the} next century will be much ~~was~~ better than previous.

Firstly, last hundred years were not as good as some people says. I don't think that something could be worse than ~~two~~ world wars, when millions of people died and "cold war", when world might be destroyed by atomic bombs of ^{the} USA and USSR.

Secondly, nowadays new technologies and ideas ^{are} becoming more interesting for big companies and countries than natural resources like coal and other kinds of fuel. ~~for~~ this reason people will damage the environment less and won't need to have wars for resources.

New technologies also ~~can~~ ^{could} help prevent natural disasters or make them less dangerous for people.

To sum up I disagree with the statement about ~~that~~ the next years, because technologies will help the world.
