WRITING

Some people say that the next hundred years are likely to be far worse than the last hundred years. ~~It is not consistent~~ Why do people think so? Is it true or not? I will help you to find the answer.

Our world is changing. We do not know what it is going to be like twenty years from now. Even five years. I completely agree with the statement. It is going to be far worse than the last hundred years. Of course we fortunately do not have wars as the First World War hundred years ago. We do not need wars in the modern world. We need science. Science gives people atomic bombs. That is the first reason why the situation is getting worse every day. It takes only a ~~minute~~ ^{minute} to destroy a country. It is really important to see the problem. We destroy our planet. We are sick because of air ^{is} pollution. Our health is destroyed by chemical plants. Yes, the next hundred years are likely to be far worse than the last hundred years.

Our future is in our hands. We have to save the planet, save our health. That is why we have to solve global problems.
